BMF IT Solution Plus - for all your IT needs

In a recent survey of BMF members, it was identified that the **top three IT challenges** being faced by organisations like yours are:

1. Keeping up to date with current IT software versions and compatibility
2. Providing 24/7 access and mobility
3. Renewing old hardware

One of the most comprehensive ways of addressing all these challenges is to consider moving to the Microsoft Cloud.

Take your first steps to the Microsoft Cloud with Phoenix Software

As a BMF preferred supplier of Microsoft solutions, Phoenix Software knows all about the challenges you face and can help you overcome the daily burden of IT with the Microsoft Cloud.

With the BMF IT Solutions Plus service from Phoenix Software, you can:

- Be on best-of-breed technology and enable your users to be more productive
- Eliminate the risk associated with managing on-premise IT infrastructure
- Get 24/7 support for your organisation at no additional cost

Microsoft Office 365 – enterprise IT at SME pricing

With Microsoft Office 365, you can improve productivity across your business and collaborate with your team - from anywhere. Plus, you need never worry about software licences or buying costly upgrades again.

Microsoft Office 365 brings you all the tools you know and work with every day, but with the reassurance that you always have the most up-to-date versions. You can even choose to have the software (known as apps) available just online or downloaded onto your desktops too.

It allows you to access the software from wherever you are - via PC, Mac, tablet or phone. Start a document on one device and then complete it on another. Collaborate with your team on shared documents - making project work seamless.

But Office 365 isn't just about Microsoft Office software products ...

There is built-in security to protect your sensitive data. SharePoint provides you with your own Intranet - giving you a platform to share data, documents and ideas. While Skype for Business allows you to call anywhere in the world, share screens and even video call from your device.

BMF Plus Services
adding help where it's needed

"We can stay onsite, migrate entirely to Azure or operate an Office 365/on-premise hybrid solution in the future. The important thing is we have the flexibility to do what is right for the organisation. We have been able to keep both doors open without committing ourselves to one path in the future, while at the same time reducing our software costs without compromising on the software we use."

Daniel Adams, Infrastructure Manager, Sentinel Housing Association

See for yourself – take our free* no obligation Cloud Assessment

Why not join Phoenix Software for a free* Microsoft Office 365 and Cloud-Readiness Workshop – exclusively for BMF members, valued at **£1,000** per BMF member.

During this non-technical overview workshop, you will see the Microsoft Office 365 products available to you and your users and find out how, by working with Phoenix Software, moving to the Microsoft Cloud can be simple, affordable and risk free.

Phoenix Software has helped thousands of organisations just like yours migrate to the Microsoft Cloud over the last three years.

* The Phoenix Software free no obligation Cloud Assessment is worth £1,000. This offer is limited to BMF members only and applies only to the Microsoft Office 365 and Cloud-Readiness Workshop. Terms & Conditions apply.

Why Phoenix Software?

As one of the UK's largest suppliers of software and IT solutions to organisations across the UK for almost 30 years, Phoenix Software has built up a reputation for being a trusted advisor, helping drive innovation and unlock productivity. It is at the forefront of delivering technologies that transform the customer experience and provide significant return on investment.

Phoenix Software also provides Software Asset Management services and a range of IT professional services. It has a team of highly-qualified and experienced systems engineers offering design, planning, project management, implementation and support services for a range of key software products.

Phoenix Software has close working relationships with the world's key software and hardware vendors including Microsoft, Dell, HPE, Symantec, VMware, Citrix, IBM, Adobe, Sophos, Veeam and many more. As a reflection of its knowledge and expertise, it has gained some of the industry's highest partner accreditations. The depth and breadth of these accreditations reflects Phoenix Software's commitment to maximising customers' return on IT investment while minimising the risk of implementing new technologies.
