"My favourite thing about being on the apprenticeship programme with LEAP was being able to learn while on the job, the way the programme was set out was simple, it gave you the opportunity to look back and see how you have been progressing throughout. I also enjoyed meeting other people who were also doing an apprenticeship, sharing stories with them and seeing all the different things they were able to achieve."

"The workshops were amazing and not only did I learn loads but I made some great internal relationships with various people that, in my day to day role, I would have not been given the opportunity to meet."
